# Computing

At Harewood C of E our children are given the opportunities to develop their computer skills using a range of IT equipment to provide them with the computing knowledge that they will need for the rest of their lives.
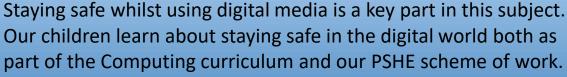

The use of computers in a variety of forms is essential to children's lives at school and at home. 'Computational thinking' is a skill which children must be taught so they are ready for the future workplace and to take part in the rapidly changing digital world.

Computing in its different forms is fun and allows our children to solve problems, design systems and explore and understand the endless possibilities of today's computer based technology and the world beyond their locality.

Staying safe whilst using digital media is a key part in this subject. Our children learn about staying safe in the digital world both as part of the Computing curriculum and our PSHE scheme of work.

"Education for Life In All Its Fullness"
