

Design and Technology

At Harewood C of E Primary School, we intend to deliver an engaging and practical Design and Technology curriculum, which encourages children to use their creativity and imagination to design, make and evaluate products within a variety of contexts. Children learn a range of Design and Technology skills including mechanical systems, electrical systems, textiles and structures.

As well as the product design side of Design and Technology, we value the importance of Cooking and Nutrition. This is a life skill and will stand children in good stead for when they mature into adults and live independently in the future. All children are taught the principles of a healthy and varied diet and have the opportunity to prepare and cook dishes, using a range of cooking techniques. Children are also taught where ingredients come from to further develop their understanding while cooking and baking.

Often our Design and Technology projects are cross-curricular in nature, an approach that makes learning both meaningful and enjoyable!

“Education for Life In All Its Fullness”
