

Geography

At Harewood C of E Primary we believe Geography inspires in children a curiosity and fascination about the world in which we live, not only in the local area of Leeds but about diverse places, people and natural or human environments. Paired with a deep understanding of the Earth's physical and human processes in ways that are meaningful and relevant to them, this curiosity is fostered and nurtured.

As children progress through Harewood, their ever-growing knowledge of the world should help them to deepen their understanding of the formation and use of landscapes and environments.

Children will then leave our school with geographical knowledge, understanding and skills that allow them to explain how the Earth's features, both in their local area and places further away from Yorkshire, are shaped, interconnected and changed over time.

“Education for Life In All Its Fullness”
